

StarLeaf Breeze – software for video calling and conferencing

With StarLeaf Breeze you gain all the power of business-grade high-definition video, multiparty conferencing, and content sharing on your PC and/or tablet. As a complete video collaboration environment, it is ideal for today's workforce. Perfect for when on the move, working from home or even in the office—you stay personally connected and face-to-face with colleagues, customers and partners. And just like all StarLeaf telepresence solutions, it's easy-to-use and very easy to install. It's simply a breeze.

Meet anyone, anywhere, anytime

StarLeaf Breeze offers universal connectivity so that you can hold or join meetings easily, no matter where you are or where a video conference is being held. It enables secure calling to any StarLeaf room or personal telepresence system, as well as the ability to call any standards-based video conferencing system, be it hardware or software.

And with the Guest Invite feature you can ask anyone to join you on a video call or conference, for free, directly from their PC, Mac, or iPad, enabling you to meet anyone outside of your organization, anywhere in the world.

When using StarLeaf Breeze to call a StarLeaf or a traditional room-based video endpoint you can zoom in and out using far end camera control. Sharing and receiving content is standard, as is encryption.

With StarLeaf Breeze you benefit from all the versatility of our stunning and intuitive user interface, along with the ability to make both video and voice calls.

FEATURES

- ▶ Send and receive video and voice messages
- ▶ Advanced StarLeaf technology for packet loss resilience and low end-to-end latency

On-demand video calling anywhere in the world

There are no limitations with StarLeaf Breeze, it gives you on-demand voice and video calling 24x7, allowing you to make and receive calls anytime and anywhere. And just like with any StarLeaf endpoint, you have all that you need to run your own on-the-fly multiparty video conferences of up to 17 participants, whether you dial out or invite contacts to your Meet-me address. It is the perfect way to stay present and in-touch with distant colleagues, teammates, head-office, external customers and partners. It's easy, instant and allows you to be anywhere.

Instant access to corporate directories, personal contacts and favorites

The StarLeaf Breeze user interface works in exactly the same way as the StarLeaf Phone and Touch, and requires no training to get started. From your PC or tablet you can scroll through or search personal and corporate directories. You even get to nominate favorites for one touch speed dialing.

Unique StarLeaf visual mail for voice and video messages

You can record personal video greetings—for when you are away. And of course, you receive and play back both video and voice messages. In addition, StarLeaf Breeze allows you to leave a personal video message for any colleague lucky enough to have a StarLeaf video solution.

Free to install

StarLeaf Breeze is free for all customers with a StarLeaf Call concurrent usage package. Each concurrent usage license entitles up to 20 individuals to use StarLeaf Breeze on any, or all, of their PCs, Macs and iPads. Now you can make video calling and conferencing available to everyone across your organization without installation fees.

Easy to manage

All StarLeaf hardware and software solutions are managed from the cloud by StarLeaf Call, allowing you to video call and conference, anyone, anywhere in the world, without the need for specialist IT skills.
